Emergency QR Code — Coming Soon

A life-saving feature under development.

Panlum is preparing an **Emergency QR Code** tool designed for use in crisis situations, accidents, or natural disasters.

Each individual can generate a **personalized QR code** with essential medical data (name, blood type, allergies, conditions, and emergency contact).

The QR can be printed as a **sticker or card**, always accessible offline, even in regions without connectivity.

First responders simply scan the QR to instantly see the critical information needed to save lives.

✨ This function will be **free to the public**, reinforcing Panlum's commitment: *where luxury meets purpose, and innovation serves humanity.*
